## WPML Multilingual Translation

Upon detecting WPML plugin RSW theme places language translation drop down menus above the social header and under the responsive menu for mobile devices. These functions are placed for best responsive features.

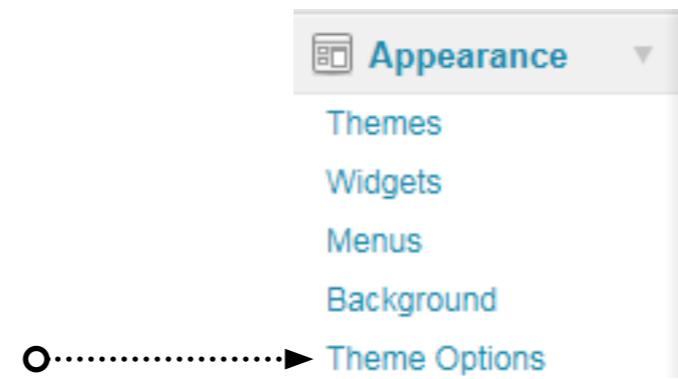

If the plugin isn't active it skips these functions without displaying them.

Theme options string variables is provided in theme root folder by file name wpml-config.xml . It requires WPML string translation plugin to translate these strings.

# Uploading RSW via FTP to Wordpress

1. Download the zipped theme pack to your local computer from themeforest and extract the ZIP file contents to a folder on your local computer.
2. Using an FTP client to access your host web server.
3. Upload the Theme files in the extracted folder called ‘rsw’ (its inside the extracted ‘rsw-packed’) to wp-content/themes directory provided by WordPress. Please make sure you’re uploading the files from the extracted rsw zip.
4. Visit Administration > Appearance > Themes, under the Manage Themes tab, under the Available Themes, if necessary navigate to the page displaying that Theme, then click the Activate link to make the Theme, the Current Theme.

Once Activated you'll get the RSW theme options in the sidebar.

# Building the Menus

## - Adding more items

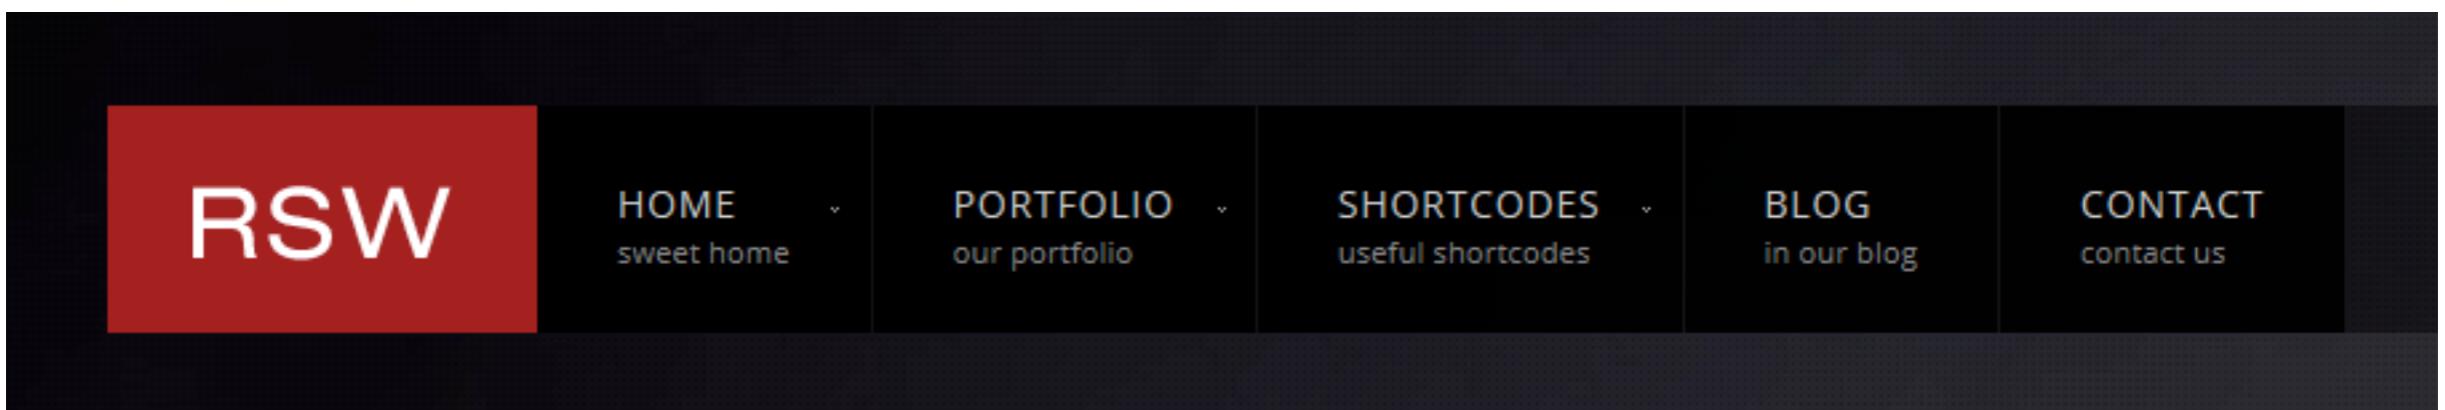

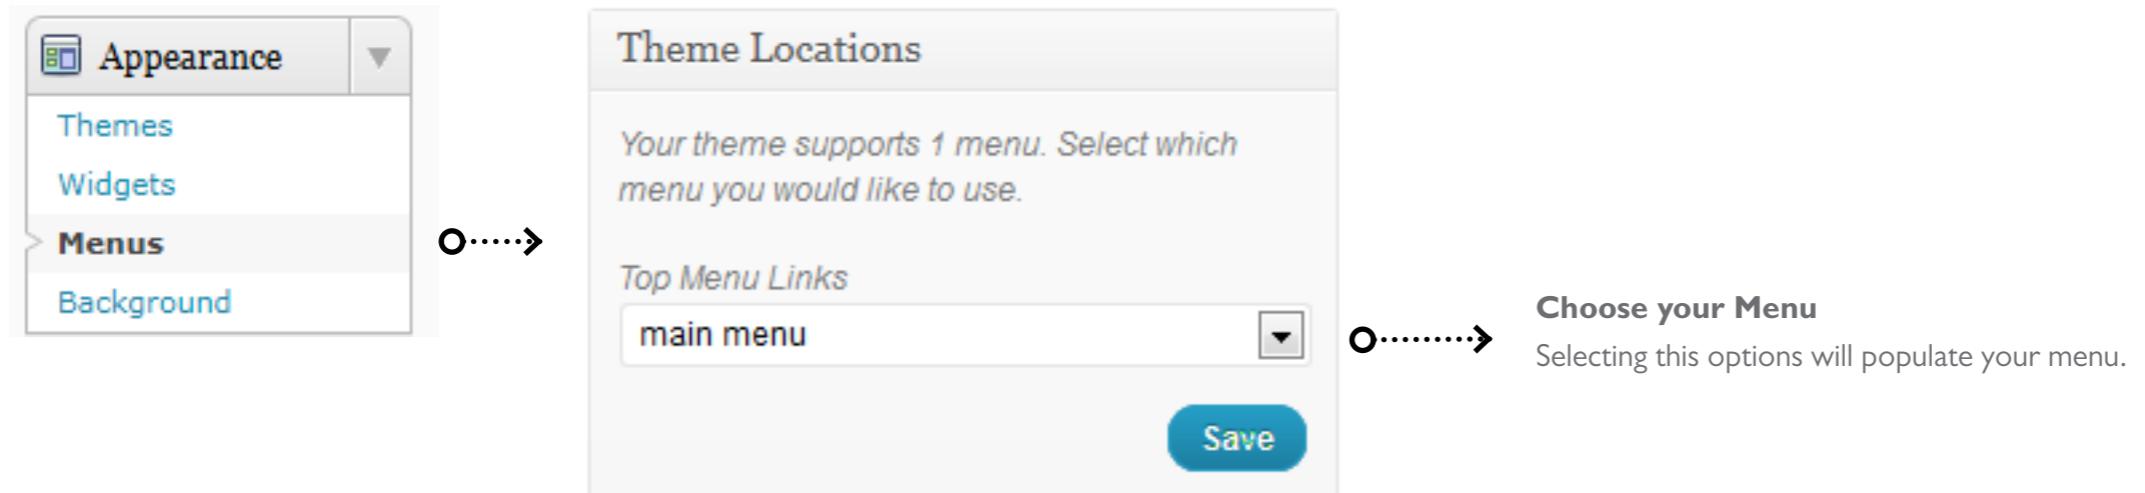

The screenshot shows the 'Appearance' menu in the WordPress admin bar, with 'Menus' selected. Below it, the 'Pages' and 'Categories' sections are displayed. A dotted arrow points from the 'Add to Menu' button in the 'Pages' section to the 'Portfolio' menu item in the main menu editor. Another dotted arrow points from the 'Add to Menu' button in the 'Categories' section to the 'Filtered Portfolio' menu item. Red numbered circles '1' and '2' are placed near the 'Add to Menu' buttons to identify them.

**Create more item**  
Pages, Categories or Custom Post Types can be added easily by selecting and clicking 'Add to Menu'

**Indenting**  
Indenting the items creates sub menus for the Photo Menu

# Building the Menus

## Creating a Blog Page

# Blog list Template

Goto WP-Admin > Pages > Add New

The screenshot shows the 'Page Attributes' sidebar. It includes fields for 'Parent' (set to '(no parent)'), 'Template' (set to 'Blog list', with a red circle labeled '3' over the dropdown), and 'Order' (set to '0'). There is also a note at the bottom: 'Need help? Use the Help tab in the upper right of your screen.' A dotted arrow points from the 'Template' dropdown down to a 'Choose Template' section at the bottom of the page.

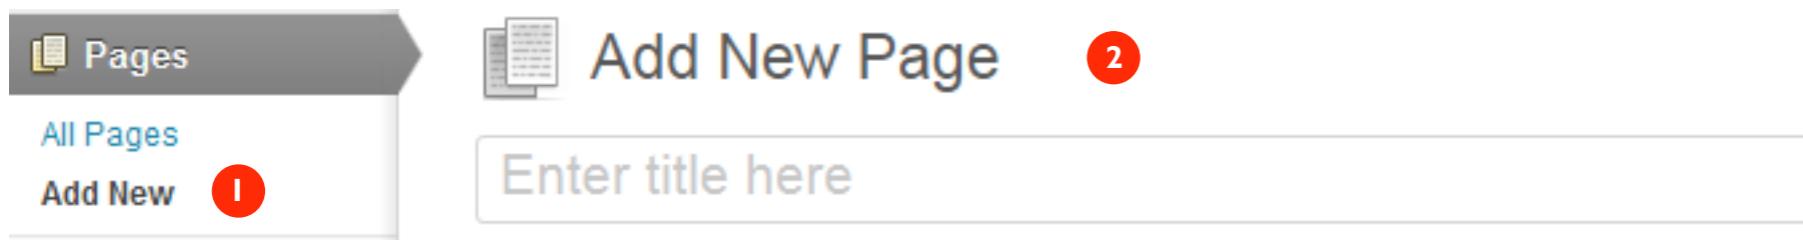

**NOTE:**

Once published this page using the bloglist template will populate your posts

## Choose Template

Blog list

# Contact Form Template

The screenshot shows the 'Page Attributes' sidebar. It includes fields for 'Parent' (set to '(no parent)'), 'Template' (set to 'Contact Template'), and 'Order' (set to '0'). A red circle with the number '3' is placed over the 'Template' dropdown. At the bottom, there's a note: 'Need help? Use the Help tab in the upper right of your screen.' A dotted arrow points from this note down to the 'Choose Template' section below.

# Fullwidth Template

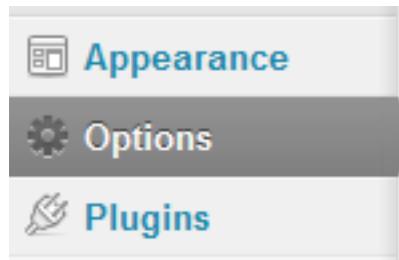

The screenshot shows the 'Page Attributes' sidebar. It includes fields for 'Parent' (set to '(no parent)'), 'Template' (set to 'Fullwidth'), and 'Order' (set to '0'). A dotted arrow points from the 'Template' dropdown down to a 'Choose Template' section at the bottom. The 'Template' dropdown is highlighted with a red circle containing '3'. A red circle containing '4' is placed next to the 'Publish' button. The 'Choose Template' section contains the text 'Fullwidth Template'.

## Applying Sidebars

# Multiple Sidebars

**Activate Sidebars by filling the text box with a custom name**

**Sidebar 1**

**Sidebar 2**

**Sidebar 3**

**Sidebar 4**

**Sidebar 5**

**Sidebar 6**

## Activate Sidebars by entering a Name for it

You can activate sidebars on demand by giving the sidebars a name. Active sidebars are listed in the Widgets area.

## Sidebar 1 to 20

'Choice of Sidebar' option is found in all Post and Page editing screen.

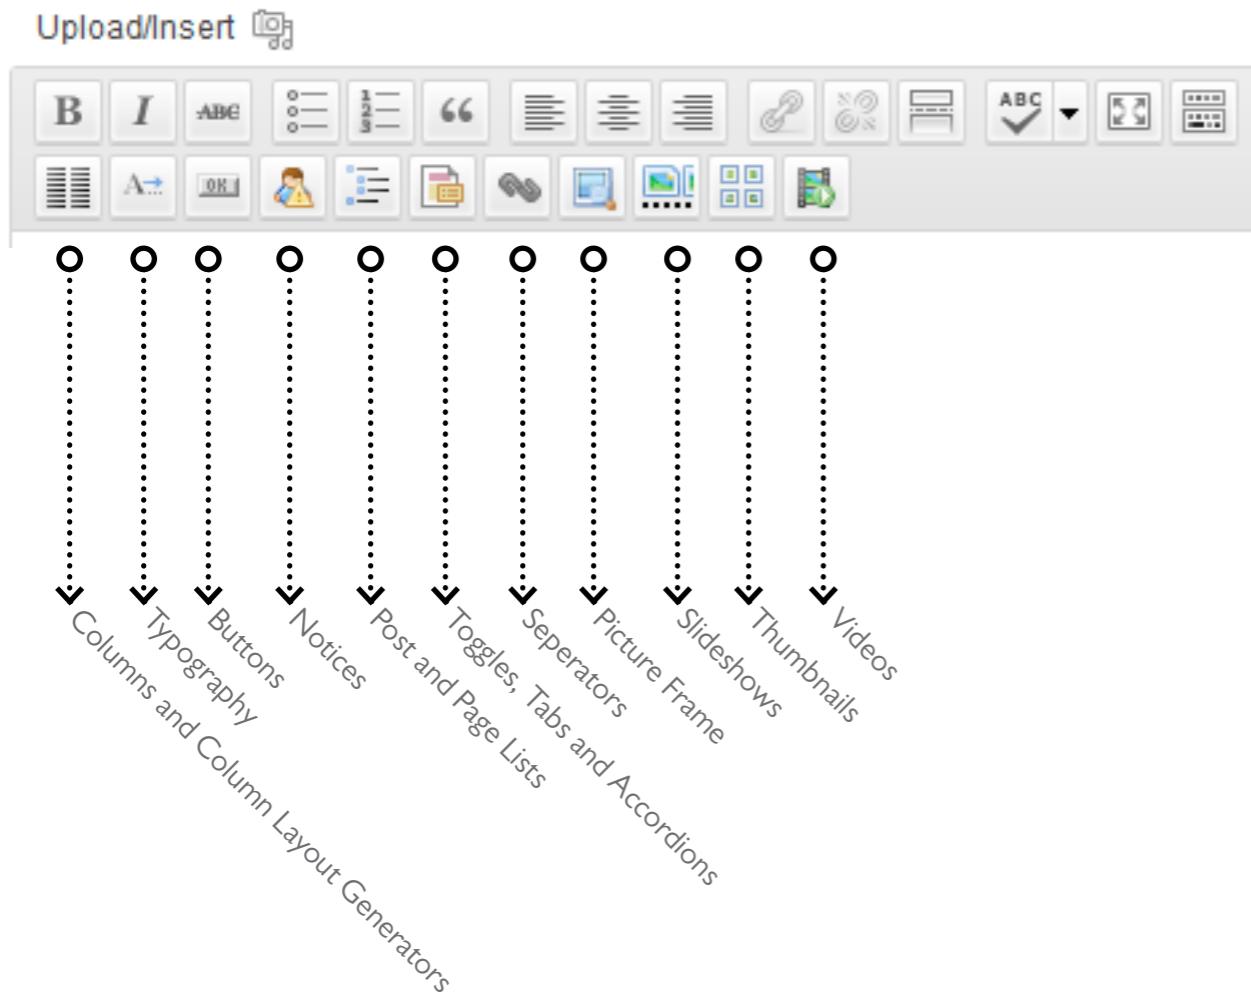

## Choice of Sidebar

For Sidebar Active Pages and Posts

## Shortcodes Generator

## Shortcodes GUI

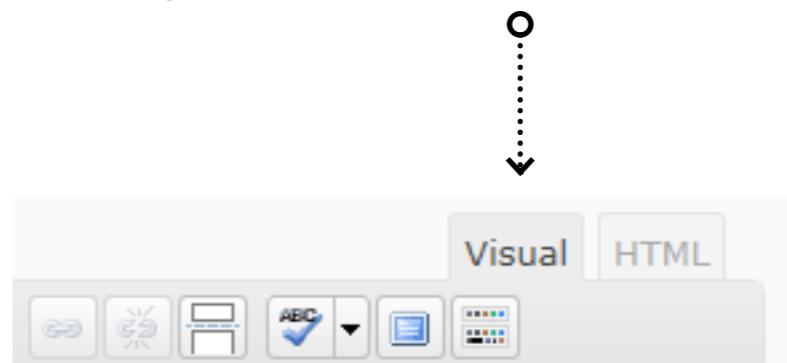

The feature of Generating Shortcodes through the Post and Page editor makes it a breeze to apply Shortcodes. There is no longer need to memorize or refer to any of them. Clicking each shortcode button gives you a Pop-up with the configurations required to generate them right into the editor.

Complex text layouts can be generated using the Columns Shortcode.

**NOTE:**

For the Shortcode GUI to be visible you'll need to be in the Post or Page editor in 'Visual' mode.

**NOTE:**

The **Thumbnails** and **Slideshow** shortcodes require image attachments in the post or page it's generated in. Just upload Multiple images to the post or page and click save - no need to insert the image to the contents area manually. Once the shortcode is generated it'll pick the attached images and display them.

# Shortcode Slideshows

- 1) Goto WP ADMIN > PAGE > ADD NEW
- 2) Fill the TITLE (important for Gallery setup) and CONTENTS
- 3) Upload your IMAGES
- 4) Press Save All ( As shown in below screenshot )
- 5) Publish!

**1**  Click the Upload icon

This brings up the uploader popup where you can add multiple images by drag and dropping the files.
